A 15.6 lbs. bag covers 5,000 square feet.
(equals .75 pounds of Nitrogen per 1,000 square feet.)

Net Wt. 15.6 lbs. (7.1 kg)

Guaranteed Analysis

Total Nitrogen (N)	24.00%
1.75% Ammoniacal Nitrogen	
17.48% Urea Nitrogen*	
4.77% Water Insoluble Nitrogen**	
Available Phosphate (P2O5)	2.00%
Soluble Potash (K2O)	12.00%
Calcium (Ca)	1.45%
Magnesium (Mg)	0.50%
0.50% Soluble Magnesium (Mg)	
Sulfur (S)	6.10%
1.04% Free Sulfur (S)	
5.06% Combined Sulfur (S)	
Boron (B)	0.02%
Iron (Fe)	1.00%
0.04% Chelated Iron (Fe)	
0.01% Soluble Iron (Fe)	
Manganese (Mn)	0.06%
0.02% Chelated Manganese (Mn)	
Zinc (Zn)	0.05%

Derived From: Sulfate of Ammonia, Urea, Polymer Coated Sulfur Coated Urea, Urea-Formaldehyde, Crotonylidene Diurea, Diammonium Phosphate, Murate of Potash, Sulfate of Potash, Sulfate of Potash-Magnesia, Sodium Borate, Iron Sulfate, Iron EDTA, Manganese Sulfate, Manganese EDTA, Zinc Sulfate.

*7.79% Slowly Available Water Soluble Nitrogen from Polymer Coated Sulfur Coated Urea

**1.77% Water Insoluble Nitrogen from urea formaldehyde

**3.00% Water Insoluble Nitrogen from Crotonylidene Diurea

turf TRUST® 24-2-12

PROFESSIONAL STARTER FORMULA

Four (4) applications of **Turf Trust® Professional Starter Formula** Fertilizer are recommended for optimal results.

- 1st Application: Early spring (March) Apply early to encourage a thick lawn **Do not apply if the soil and grass are frozen.**
- 2nd Application: Early June
- 3rd Application: Early September
- 4th Application: First week of November. This feeding is critical to stimulate root system.

Note: The minimum interval between applications of **Turf Trust® Professional Starter Formula** is 8-10 weeks.

TURF TRUST's® controlled release Nitrogen formulation includes CDU as the primary source of Water Insoluble Nitrogen (WIN). **Turf Trust® Professional Starter Formula** slowly and gently, "spoon feeds" your lawn. The result is beautiful turf without excessive growth.

Controlled release nitrogen and a low salt index make **Turf Trust® Professional Starter Formula** an excellent starter fertilizer for newly seeded lawns!

This bag of **Turf Trust® Professional Starter Formula** will feed a 5,000 square foot lawn at the recommended rate of 3.16 lbs. of **Turf Trust® Professional Starter Formula** per 1,000 square feet of lawn. Feeding **Turf Trust® Professional Starter Formula** at this rate supplies .75 lbs. of Nitrogen per 1,000 square feet.

For Best Results, Follow These Simple Instructions:

- Cut lawn before applying **Turf Trust® Professional Starter Formula**
Note: Pro Trust Products recommends bagging clippings and raking leaves and other lawn debris before application. This helps **Turf Trust® Professional Starter Formula** granules reach the soil surface.
- To receive the maximum benefit of **TURF TRUST's®** controlled release formulation, Pro Trust Products recommends using a broadcast spreader to apply **Turf Trust® Professional Starter Formula**. Drop spreaders can grind the granules of **Turf Trust® Professional Starter Formula**, drastically reducing the feeding time frame.
- Use the table and instructions below to adjust your broadcast spreader to apply **Turf Trust® Professional Starter Formula** at the recommended rate.
- Apply **Turf Trust® Professional Starter Formula** along the perimeter of the lawn first.
- Then apply to the balance of the lawn, working parallel, North-South or East-West. Stop the flow of **Turf Trust® Professional Starter Formula** at the end of each pass.
- Move over approximately 5 - 6 feet.
- Align the next pass so that the edge of the fertilizer broadcast pattern allows **Turf Trust® Professional Starter Formula** to land just at the wheel track of the previous pass.
- Any **Turf Trust® Professional Starter Formula** that lands on an impervious surface should be swept or blown back into the lawn to reduce nutrient run-off.
- Store **Turf Trust® Professional Starter Formula** in a cool, dry place, keeping the original bag tightly closed.

Suggested Spreader Settings		
Spreader Model	Width of Coverage	Setting
Spyker	8ft	4
Scotts Speedy Green	8ft	5
Earthway	8ft	12

If your spreader is not listed here, you can easily adjust your broadcast spreader to apply **Turf Trust® Professional Starter Formula** at the recommended rate of 3.1 lbs. per 1,000 sq. ft.

Adjust your spreader so the openings in the bottom of the hopper measure slightly more than 1/4 (.25) inch at its widest point.

Note: Above spreader settings are approximate. The condition of your spreader, your pace during application and lawn terrain will affect the application rate. Detailed application instructions are available at www.protrustproducts.com

Warm season grasses (i.e. Zoysia, Bermuda Grass) should only be fertilized once per year. Early June is the ideal time for this application.

Notice: **TURF TRUST's®** controlled release formulation helps protect the environment by reducing nutrient run-off. You can help by promptly sweeping or blowing **Turf Trust® Professional Starter Formula** off of impervious surfaces back onto your lawn.

The product is being used in accordance with a soil test that was conducted by a laboratory identified under §8-803.7 of the Agricultural Article, Annotated Code of Maryland, performed no more than 3 years before the application.

Caution: Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn, and sweep any product that lands on the driveway, sidewalk, or street back onto your lawn.

Keep out of reach of children. This product may be harmful if swallowed and may cause skin and eye irritation. Flush eyes with water as soon as possible.
